

## TONOPAH EXT. GIVING GOOD ORE RETURNS

Production for Last Half September Showed Marked Increase in Values.

### MINE IS ABOUT UNWATERED

Large Development Performed on 1880 Level of Victor Shaft Workings

Bullion week passed with Tonopah Extension increasing its production for the last half of September by \$19,000 over that of the preceding fifteen days. This goes to show that the property is now entering upon a wonderful era of productivity and accounts for the rapid rise in the price of shares which has been recorded during the last three or four weeks, stock selling Friday up to \$2.50.

Installation of pumping equipment has practically been completed and large development is now in progress on the 1880 level of the Victor shaft. Sinking will again shortly be in order and there will be no cessation until the 2200 level has been reached.

The physical condition of the mine was never better and it is now predicted that the property will soon take its place, if it has not already done so, among the great silver producers ever opened in the west.

Official report of operations for the week ending Saturday morning, Oct. 7, follows:

**McKane Shaft.**  
1200 level—1203 west drift was advanced 15 feet in Extension breccia. 1203 crosscut advanced 12 feet in trachyte.

**Victor Shaft.**  
1680 level—1620 raise was continued on low-grade quartz. 1605 south stope was carried 23 feet on four feet of ore. Stopping is in progress on Murray vein.  
1760 level—Stopping on Murray vein.

1804 intermediate level—Stopping on Murray vein.

1880 level—1803 west drift advanced 10 feet on 6 feet of good ore. 1810 east drift was advanced 11 feet on 4 feet of ore. 1804 raise was advanced 8 feet on 5 feet of ore. Stopping is in progress on Murray vein. Development, 113 feet.

Place your order with the Bonanza for job work and you are assured of quality printing. We have the most complete printing plant in the state, Reno not excepted.

### TONOPAH MIDWAY STILL EXPLORING PROPERTY

Tonopah Midway is prosecuting development along the same conservative lines, although nothing of a sensational nature has been reported. Operations are being confined largely to the 1200 level of the new shaft, where the fault was passed on a vein that lies about 150 feet from the shaft. Lensers are still operating with indifferent success, although one or two are realizing quite handsomely.
